## HELLO

I started as an artist at an early age, and in his teens he did paintings by hand before graphic software was widely available. As computers became more popular, I gradually switched to doing digital work with the help of the computer, using applications such as Corel Draw, Macromedia Freehand, and others before they went extinct. I am now a competent artist whose work is fully digital, mostly through the use of the Adobe Suite cs5. Due to the extent of his experience as a graphics artist, has a keen eye for graphic design as a fashion designer would have for fashion. knows which styles are old, which are current, and mostly important, which set a new trend. One could say that my design work is more radical and "in my face" due to the fact that my work experience is international, and thus I am not confined to the design and graphics standards of just the United States. I continually works and studies to stay up-to-date on the latest design tools and trends.

## TECHNICAL SKILLS

Creation of design, color harmonia, video editing, photo retouching, image manipulation, user interface, ads and others include my work on the Internet, I'm always researching and testing new technologies.

● xHTML / CSS //////////////

● Social Network //////////////

● JavaScript / jQuery ///////

● User Interface (UI) //////////////

● Adobe Creative Suite ////////////////

● Print Art //////////////
